COMPANY INFORMATION

Graco Metals is located in Houston, Texas near Highway 288 and Beltway 8, providing easy access from all parts of the city. Our sole products are spiral round and oval pipe, fittings, and related products for the heating, air conditioning and ventilation industry.

We offer a complete line of standard and custom spiral pipe and fittings for every requirement. The spiral pipe machine we own and operate is the most modern piece of equipment in Texas used in the manufacturing of spiral pipe.

We bring over 20 years of experience in the spiral pipe manufacturing business. Our management has also been an active participant in the contracting business and understands the problems that our customers encounter every day. We would be happy to use our unique perspective to address any questions you may have regarding spiral pipe.

We at Graco Metals pride ourselves on providing not only fast and efficient service, but also personal attention. Each of our customers receives the very best from us in quality, delivery, and value, as your satisfaction is our business.

SPECIFICATIONS

All Graco Metals standard products are manufactured from galvanized steel of lock-forming quality meeting ASTM-A-527 qualifications, and are designed to meet SMACNA and ASHRAE specifications.

STANDARD FIELD ASSEMBLY

- Pipe to pipe connection to 60" diameter shall be by sleeve coupling.
- Pipe to fitting connections to 60" diameter shall be slip fit (collar of fitting projecting into pipe).
- Pipe to pipe and pipe to fitting connections 61" and larger shall be by angle ring or other Flange connections.

In an ongoing effort to improve our products, Graco Metals reserves the right to revise the designs and specifications of its products as technology advances.
